Silicone Milk Hose

Made from 3-A approved silicone. Silicone hosing promotes cleanliness with no cracking, remains flexible, maintains physical properties during cold weather and sustains a longer life.

Available Sizes: Round - 5/8", 3/4"
Tri-Circle - 5/8", 3/4"

Short Air Tubes and Twin Tube

Durable, flexible clear tubing provides excellent airflow and longevity.

Short Air Tubes available in 9/32" inside diameter, 8.5" in length.

Twin Tube available in 9/32" inside diameters.

Hoof Blocks

Plastic – Long lasting, skid resistant design, bright color for visibility throughout barn.

Rubber – Soft material, shock absorbing, less likely to clog manure systems, skid resistant.

Note: We recommend heating both the hoof and the block (rubber).

CIP Inserts & Jettors

Designed for the Lauren Tri-Circle® Silicone Liners

- Adaptable to most CIP trays
- Tighter seal during washing
- Long lasting silicone material

C Phase Enhancers

- Adjust C Phase without affecting A Phase
- Allows liner to close slower & softer
- Better teat ends
- Comfortable cows

Lauren Tri-Circle® Silicone Liner Fits Lauren 608 Shell

Complete Seal

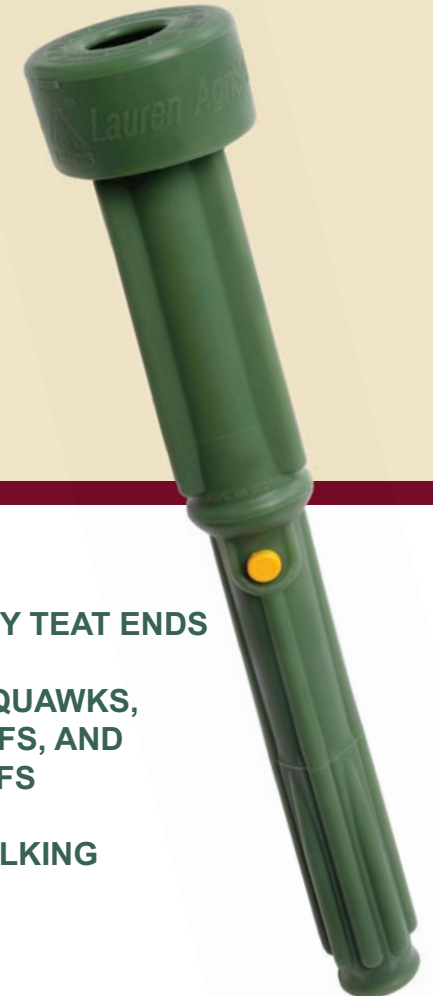

Non-Twist

Balanced

Ergonomic

Designed specifically for Lauren Liner

LAUREN TRI-CIRCLE® SILICONE LINER

Tri-Circle® Barrel

3000 Milkings

Vented

Cleanliness
(No cracks, low bacteria growth)

Gentleness
(Low Durometer and Modulus)

Healthy Teat Ends

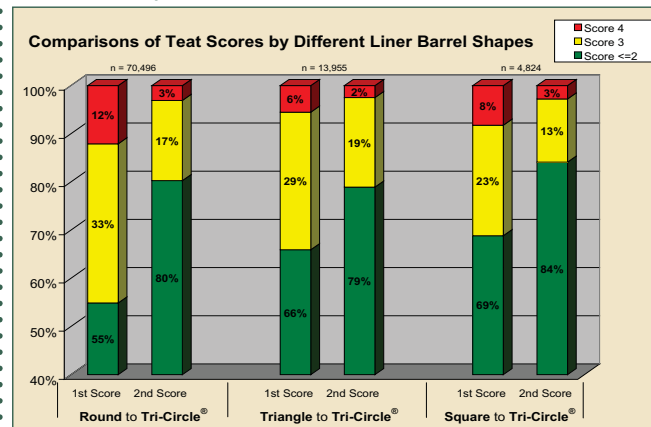

"We have seen better teat ends, faster milking, and lower SCC, very satisfied with the Lauren Liners."
Twin Birch Dairy (NY) 1000 cows, double 16 parallel

"Being able to milk at a higher vacuum and make teat ends better at the same time is a real win-win."
Bos Dairy (IN) 3200 Cows, 72 stall rotary

"Improved teat ends. Squawks and fallofs dropped dramatically. Less dancing, definitely faster milkout."
Dave Siemen (MI) 500 cows, double 12 herringbone

"With the big difference and improvements in teat health, my investment in the Lauren Liner is more than paid for by the reduction of clinicals and SCC."
Maunsha River (WI) 460 cows

Realistic Expectations: Better Teat Ends

Less Squawks

"The Green Liner made the parlor work like it was supposed to...faster milking, less squawks!"
Northern Lights Dairy, (ND) 600 cows, 36 stall rotary

"Machine drop-offs & liner squawks became a non-issue, increasing efficiency & hugely boosting milker attitude." Legacy Farms (TX) 5000 cows, (2) double 40 parallels

"We noticed right away that the cows didn't prance as much. Squawks and liner slips are way less... teat ends are quite a bit better"
DeLing Dairy (AB) 140 cows, double 12 parallel

Fast Milking

"We had such a dramatic improvement in teat ends in just 2 months, and our average unit on time was reduced by 1 1/2 minutes."
Graywood Farms (PA) 535 cows

"The Lauren Liner doesn't start out slow nor does it taper off towards the end like most other liners. We've seen teat ends improve, less slippage, less re-attachments, and faster milkouts"
Hi Hills Farm (OH) 575 Cows, double 10
